The *Bohemia* Arrives Direct from Hamburg.

ELEVEN DEATHS AND FOUR SICK

The Steamer Held at Lower Quarantine and the Sick Taken to Swinburne Island.

The Normannia Passengers Allowed to Leave Fire Island—The Disease Abroad.

NEW YORK, Sept. 17.—The steamship *Bohemia* has reached New York and anchored in the lower quarantine. Her coming was dreaded as much as had been that of her sister-ship and death house—the *Scandia*. She left Hamburg at the time when the pest was at its worst, and her 681 steerage passengers, gathered from the infected regions of Germany and Russia, could not but be expected to bring the cholera with them.

The *Bohemia* sailed from Hamburg on Sept. 3 and was due yesterday morning. The health officers waited with anxiety for her coming and at 9:30 p. m. she was added to the cholera fleet which rides in the lower bay.

The captain reported eleven deaths at sea, all children, and claims they died of diarrhoea troubles. Four sick people on board were removed to Swinburne Island.

The names of those who were removed to Swinburne Island are: Max Feingold, aged six years; E. Chage Bais, twenty-eight years; Leo Hanfeldt, twenty-six years, and one small child of the steerage.

The *Bohemia* has on 633 steerage, ten cabin and seventy-seven crew, all passed and found well. The ship's condition as to cleanliness is first-class.

The health board bulletin announces another suspected case of cholera in the city. The bulletin reads as follows: "The only suspected case of cholera in this city since last bulletin is Edward Hoppe, of 1625 Madison avenue, who died yesterday. It is under investigation."

The four immigrant girls who landed from the Friesland and who are supposed to have introduced the cholera into this city have been sent to the Willard Parker hospital, where they will be detained until the disease is stamped out.

A conference was held at the mayor's office yesterday between the mayor, President Wilson, of the board of health, Public Works Commissioner Gilroy and Police Commissioner Martin and other officials. The cholera situation was discussed, and it was stated that the mayor had decided to ask the president to stop all immigration to this country until all danger was passed.

The mayor also notified Commissioner of Street Cleaning Brennan that there was a sufficient supply of water available for flushing the streets. In the vicinity of the river fronts, the mayor informed the commissioners that the river water could be used and the fire department would co-operate by furnishing men and engines for this purpose.

LEAVING FIRE ISLAND.

The Belated Passengers at Last Start Homeward.

FIRE ISLAND, Sept. 17.—This place is practically deserted. The police, reporters, operator, hotel help and the detachments of troops are the only people here.

This state of affairs is in marked contrast to the general air of activity displayed during the last few days, but it is most probable that the end is not yet and that soon another crowd of quarantined passengers from some of the vessels now detained in New York bay will be sent here.

At 7:30 all the passengers that were willing to go to New York via the water route were on board the *Cepheus*. Only about thirty refused to go by the steamer, and after a good deal of telegraphing between them and the state officials, permission was granted to Dr. Voight to allow them to go to Babylon and avail themselves of the railroad facilities in reaching New York.

Each was armed with a clean bill of health, in order that no trouble might ensue with the Babylon health authorities. A body guard of soldiers was sent with them, in order to meet any emergency that might arise. The *Cepheus* got away about 9:10 o'clock. A shout went up from the people when the anchor was weighed, and all seemed to be pleased that they were at last homeward bound, after so many vicissitudes.

At 9:20 the remaining passengers were all on board the *Ripple* on the way to the Babylon shore. Dr. Voight accompanied the party, and will go to New York with them.

A Ripple in Babylon.

BABYLON, L. I., Sept. 17.—When the *Ripple* came alongside the Babylon steamboat dock at 10:30 o'clock, very few citizens were on hand to watch the proceedings. It is doubtful whether the fact that any of the passengers would be landed was generally known here. There was not the slightest suspicion of a demonstration on the part of the townspeople of Babylon. The escort guard from the Thirteenth regiment followed in the wake of the guards to the port. All of the released passengers took the 11 o'clock train for Long Island City and the Flat Bush depot, in Brooklyn.

Landed in New York City.

NEW YORK, Sept. 17.—The steamboat *Cepheus*, bearing the passengers of the *Normannia*, reached here at 2:30 p. m. As the *Cepheus* came up to the dock with a heavy list to port, the "now unfurtables" crowded the decks, cheering and waving handkerchiefs, while the *Normannia*'s band played a lively air and the *Cepheus*'s whistle was kept constantly going in response to the salutes of craft in the vicinity.

No Cholera in Brooklyn.

BROOKLYN, Sept. 17.—The health department reports that there is absolutely no cholera in Brooklyn. The sudden death of the Polish Hebrew girl on State street yesterday caused a scare among the health authorities for a few hours, but the investigation made of the case has satisfied them it was not Asiatic cholera.

AT FOREIGN PORTS.

The Reports from Hamburg and Other Cholera Infected Places.

HAMBURG, Sept. 17.—The fresh cases of cholera yesterday numbered 687, or eleven fewer than Thursday. The deaths numbered 213, or ten more than Thursday. There was 846 burials, or fifteen more than Thursday.

The hospitals and cholera barracks of Republican candidates. Many clubs, she said, were forming in the country, and their membership is largely increasing. The first New York state woman's club was organized in Glens Falls, last Friday.

Other speakers at the meeting were Mrs. Mary Stuart Coffin, of Michigan, who spoke enthusiastically of the work in that state; Mrs. Leggett, of Boston; Mrs. Thomas W. Chase, of Rhode Island, and Hon. John M. Thurston, of Nebraska.

Novel Damage Suit.

COLUMBUS, O., Sept. 17.—The first ever brought in Ohio courts to recover for damages to "feelings and affections," reached the supreme court yesterday. The plaintiff is William F. Morgan, of London. His mother and brother lived at Henley, O., in 1890, and on Oct. 12 of that year his brother sent the following telegram to him: "Mother dying; come immediately." It was never delivered, and his mother was buried before he knew of her death. He sued for \$5,000 damages. The defendant, the Western Union Telegraph company, demurred on the ground that there was no ground of action, and the demurser was sustained below.

How It is with Iron.

CLEVELAND, Sept. 17.—The Iron Trade Review says of the condition of the trade: An improved tone and some anticipatory notes of a better status is the report from the most of the iron and steel trade centers of the country this week. Most statements about the market are qualified, however, in view of the transitional state in which nearly all branches of the trade have been since the mill resumption, and it has been very difficult to sift temporary conditions from those likely to be more permanent.

Iron Men Go to Work.

STEUBENVILLE, O., Sept. 17.—The differences existing between the Jefferson Iron Works company and its workmen were amicably settled yesterday, and President Wallace signed the Amalgamated scale. The mill will start up Monday, except the nail department, which will remain idle for a short time on account of the low price of nails. The mill will make black sheet steel in the meantime. The heaters at the Junction iron works, of Mingo, also signed scale yesterday, and that mill will start up Monday.

It May Be False.

EL PASO, Tex., Sept. 17.—The reported capture of the Dalton brothers is probably without foundation. Ex-Governor Ross, of New Mexico, telegraphs from Deming that nothing has developed to justify the report, and so far as he has been able to learn the Dalton brothers and their gang of train robbers have not been seen in the territory. Similar telegrams have been received from various points in New Mexico.

Freight Train Wrecked.

WABASH, Ind., Sept. 17.—A wreck on the Pennsylvania road occurred at 7:30 last evening at the edge of this city. A heavy freight from the east was going through when one of the wheels of a car broke, throwing seven cars off the track and causing a general smashup. Two brakemen had their ankles broken by jumping from the train. The wrecking train did such good work that no delay was caused.

Would Rather Be in Jail than Tramp.
PLAIN CITY, O., Sept. 17.—Thad Read, the young man who criminally assaulted Mrs. Ball last week and then skipped voluntarily returned and gave himself up yesterday. He was worn out with tramping, nearly starved and sick. He said that everybody suspected him, and refused him work and food. He would rather go to jail than be an outcast and always be hungry.

Fell Into a Well.

SCOTTSBURG, Ind., Sept. 17.—Robert E. Marshall, three miles southeast of this place, while working in a well, asked to be drawn out. Upon reaching the surface he became dizzy and fell to the bottom of the well, a distance of thirty feet. He was seriously injured.

Temporarily Embarrassed.

TOLEDO, Sept. 17.—The sheriff levied upon the stock of Cray & Rood, a large hardware firm, last evening, on judgments aggregating \$25,000. The assets are not stated, but there is a prospect that the firm will be able to settle and resume business.

Did Not Founder.

ST. JOSEPH, Sept. 17.—Allison V. Armour's steam yacht *Cryphon*, which was supposed to have founded in Lake Michigan with all on board, arrived safely at this port Thursday night.

Once More Free.

COLUMBUS, O., Sept. 17.—Mike Burke, sent up from Hamilton county for four years for having burglar tools in his possession, was released yesterday on expiration of his sentence.

Forger Arrested.

COLUMBUS, O., Sept. 17.—Carl Wagner, of Fredericktown, was arrested for forging his brother's name to a \$90 check and passing it on J. M. Trowbridge.

THEIR WORK DONE.

The Convention of Republican Leagues Adjourn Sine Die.

THE SECOND DAY'S DOINGS.

All the Old Officers Re-Elected by Acclamation—The Platform and Resolutions Adopted—What Was Done at the Women's Meeting.

BUFFALO, Sept. 17.—The second day of the Republican league meeting opened auspiciously. The attendance was much larger than the first, many new delegates arriving during the night.

The day was a busy one and no less than four separate meetings were on the program. The morning business session was supposed to open at 10 a. m., but it was nearer 11 when there was a quorum present and the president's gavel fell.

The committee on league work reported the league had demonstrated that its work was of great importance to the party and that the campaign of education pressed by them was fruitful. They recommended the purchasing of Republican papers and the distributing of them to the voters of the states for educational purposes. Funds should be used to promote the organizing of clubs for the promotion of social and political intercourse.

The committee on resolutions reported through General Fairchild this platform:

The representatives of the Republican clubs of the United States in convention assembled, mindful of the splendid history of the Republican party, a history luminous with heroic services, rendered our beloved country, make the following declaration of principles:

First—We heartily endorse the wise, patriotic and statesmanlike administration of President Harrison.

Second—Believing that the principles announced by the representatives of the Republican party at Minneapolis in national convention assembled, fully expresses the sentiments of the Republican league of the United States. We therefore most cordially endorse those principles to the end that the continued prosperity of the country may be assured.

Third—Republican party has been from its birth the advocate of all measures of advancement and progress. Its principles are and always have been such as appeal to young men having the good of their country at heart. We cordially invite all young voters who believe in the prosperity and perpetuity of the Union, to unite their political fortunes with the Republican party.

Fourth—Resolved, That it be expressed as the sense of this convention that the Republican press of the country is one of the most potent agencies that may be employed to promote the principles of Republicanism, and that it is worthy of the hearty encouragement and support of all Republicans.

The platform was adopted without debate.

These resolutions were also presented and adopted:

RESOLVED, That in the future each state and territory shall be entitled to six delegates at large and four from each congressional district. Each College Republican club shall be entitled to one delegate, and each college where there is but one college in the congressional district where the college is located to two delegates in the national convention. The title of college to representation under this provision shall be subject to the action of the executive committee.

We recommend that Republicans residing in the District of Columbia having a legal residence in the states and territories connect themselves with the National Republican league.

The election of officers was next taken up, and General James S. Clarkson was re-elected president and A. B. Humphrey, of New York, was re-elected secretary, both by acclamation.

The present treasurer, W. S. Lounsberry, was also elected by acclamation, and then each state named a vice president and a member of the executive committee.

After General Clarkson had made a brief address in acknowledgment of his re-election, two campaign clubs marched into the hall escorting the Hon. White-Law Reid. There was a scene of the wildest enthusiasm, the delegates standing on the chairs and shouting themselves hoarse.

When order had been restored after much trouble by the president, Mr. Reid was introduced, and said: "Notice was served upon me that no speech was expected and that you were about to adjourn for dinner. I shall not detain you now, therefore, except to thank you and congratulate you upon the fact that the Republican fires are burning brightly and that the outlook is most encouraging. Because there has not been more noise and bluster the Democrats shout about apathy in the Republican party. I beg of you not to disabuse their minds of that belief. Let them believe if they will that eastern state events have disengaged us. They have raised such hopes before. They will be rudely shattered in November, just as usual. I finish my remarks with thanks for the pleasure of addressing you."

There were three hearty cheers and then a motion was put and carried that with thanks to the people of Buffalo the convention adjourn sine die.

Three cheers were given Harrison and Reid and then an impromptu reception was held by Mr. Reid on the stage, all of the delegates paying their respects.

At the mass-meeting in the afternoon Mr. Reid and Clarkson both spoke.

Louisville and the second Wednesday in May next were decided upon as the place and time for holding the next Republican league convention.

Lewis is Doomed.
LOUISVILLE, Sept. 17.—Governor Brown yesterday fixed the date of execution of Nelson Lewis, who murdered George Dean in November, 1890, for Nov. 11.

ter presided over a meeting of women at which there was a very fair attendance.

Mrs. Foster opened the meeting with preliminary remarks preparatory to the work the women expected to do in the campaign. She said that it was an acknowledged fact that the influence of women was great, and why should it not be as great in politics, in pure politics as in other pure things?

The relation of women to politics would be to purify them, to make the issues moral ones, and to educate at least their sons, the voters, to vote for their country's welfare, and not simply in a blind way for a party.

She said the object of the association was to encourage women to study Republican doctrines, and to arouse good men to action, and to help the election are treating 8,000 patients. Outside of the hospitals and barracks there are practically no patients. Two thousand and eight hundred of the patients now under treatment are of the dregs of the city's population. They live in abject misery in the filthiest quarters, and are of the class which has suffered most severely from every epidemic of the last fifty years. The other 300 patients, with hardly a dozen exceptions, belong to the families of fairly prosperous artisans. Of the persons who have died of cholera in the last three weeks, 3,000, or about 40 per cent., were children. In 1,000 families both parents have been taken.

The board of health have just finished an investigation of the tenement districts of Hamm, Horn, Barnbeck and Hammerbrook. An appalling condition of affairs was revealed. A member of the investigating commission says that ever since the outbreak of the plague the people in these districts have defied every law of sanitation. Hardly a tenement house was found in the four suburbs where any sanitary conveniences whatever had been provided by the landlord. Cesspools behind most of the tenements have been kept filled with decaying garbage, while in houses thirty feet off persons were sleeping, seven or eight in a room.

Since the scarcity of employment has been felt, the commissioners said, the people in these houses have only had vegetables and refuse meat to eat. After deaths from cholera they have neglected to use any of the disinfecting materials delivered to them, and have put on dead men's clothes before sanitary officials were notified of the deaths.

The people from these localities have constituted consequently two-thirds of the victims of the plague and are still filling the hospitals with their sick.

In Wardsbeck, where the cholera was supposed to have been stamped out, there were some thirty-five cases and thirteen deaths yesterday. The outbreak is said to be due to the impossibility of collecting all the clothes in death rooms for disinfection. As soon as the people apprehend that the officials are coming they smuggle away all garments which they think may be injured by infection.

There are evidences of a revival of business everywhere, except in the harbor district. There all trade, large and small, remains perfectly dead.

Yesterday afternoon Professor Koch reported to Berlin.

The six hussars have returned from the maneuvers to Laurenburg.

About 150 persons came back to the city yesterday from the seaside resorts, to which they fled when the plague was at its worst. The expected rush homeward, prophesied the last part of this week, has not come and probably will not come until the sick list and death list shall have been considerably shortened.

In Russia.

ST. PETERSBURG, Sept. 17.—Fifty-nine new cases of cholera were reported in this city yesterday, against fifty-five the day before. The deaths yesterday were eight, nine less than occurred Wednesday. In the lieutenancy of Caucasus there were 447 new cases and twenty-four deaths Tuesday. The epidemic is still virulent in the provinces of Saratoff, Samara, Simbirsk, Tambor, Kazan, Voronesh, Lubtin and the Don territory.

New York Quarantined Against.

MADRID, Sept. 17.—The Spanish government has declared quarantining against New York. The Official Gazette announced yesterday that all vessels arriving at Spanish ports will be detained. Persons arriving at frontier stations from New York will also be subjected to quarantine.

No Cholera in Austria.

LONDON, Sept. 17.—The Vienna correspondent of The Times says: "The supreme sanitary council announces that Austria is still free from cholera and that suspected cases have been proved by bacteriological examination to be without a trace of the disease."

TO THE PUBLIC.

Office of City Physician,
4 West Third Street.

The public is informed by this notice that a sanitary inspection of every residence and property within the limits of the city of Maysville will begin at once.

Any complaint of nuisances must be made to the City Physician in writing. No attention will be paid to anonymous communications.

CLEON C. OWENS,
City Physician.

CITY CLERK O'HARE is a candidate for re-election. Of Maysville's many trustworthy officials, we believe we voice the general sentiment when we say that no one is more efficient, more faithful and more popular than Mr. O'Hare.

THE recent Democratic convention at Carlisle earnestly recommended that the various county committees take immediate steps to thoroughly organize their respective counties in order to bring out a full party vote in November. The election is only about seven or eight weeks off. Let's go to work.

JUDGE DEMING, of Mt. Olivet, has been solicited by the Republicans of the Eighteenth district to make the race for Circuit Judge. Mr. Deming is a clever gentleman and all that, but the best Republican living wouldn't stand hardly any show at all in such solid Democratic counties as Nicholas, Robertson, Pendleton and Harrison.

CAPTAIN SILAS ADAMS, of Casey County, won the Republican nomination for Congress in the Eleventh district, defeating Congressman John Henry Wilson, D. G. Colson and others. The fight was a bitter one, and the factional strife engendered may result in turning the district over to the Democrats, although there is not much hope for that.

REPUBLICAN papers are trying their best to explain away the heavy loss in their party's vote in Vermont. Some of their talk is rather amusing. The Commercial Gazette says: "One of the results of the Australian ballot system is a reduction of the vote, through its complexities. That was the case in Vermont."

Complete official returns have been received from Vermont and compared with the vote of 1888 they show a Republican loss of 9,262 and a Democratic loss of only 1. These figures are from the C. G. Some more explanations are now in order by that paper. If the Australian ballot is to blame, why did the reduction fall almost wholly upon the Republicans?

JACKSON'S PROPHETIC WORDS.

The corporations and wealthy individuals who are engaged in large manufacturing establishments desire a high tariff to increase their gains. Designing politicians will support it to conciliate their favor and to obtain the means of profuse expenditure for the purpose of purchasing influence in other quarters. * * *

Do not allow yourselves, my fellow-citizens, to be misled on this subject. *The Federal Government can not collect a surplus for such purposes without violating the principles of the Constitution and assuming powers which have not been granted.* It is, moreover, a system of injustice, and, if persisted in, will inevitably lead to corruption and must end in ruin.—Andrew Jackson's Farewell Address.

GERMAN-AMERICANS

Their Union in New York Urges All to
Vote For Cleveland,

The Far-sighted Statesman, the True
Patriot, the Honest and
Courageous Man.

The German-American Cleveland Union of New York recently issued a ringing address urging their fellow-citizens throughout the country to vote for Cleveland. The address was signed by Carl Schurz, Oswald Ottendorfer, Wm. Steinway, Henry Villard, Louis Windmuller and Gustave H. Schwab, and reads as follows:

To our German-American Fellow-citizens: Impressed with the unusual importance of the coming Presidential election, we regard it as our duty to give to you our reasons for believing that the welfare of our adopted country requires the election of Grover Cleveland, and that he deserves the vote of the naturalized Germans.

Above all, we wish to state that he is a thoroughly honest man, which fact his bitter enemies do not dare to dispute. No one ever attempted to create the slightest suspicion in this respect. When he returned to private life after having held the highest position in this country, his name was as unslashed as that of Washington.

Among his most marked characteristics are his undaunted courage and his adherence to his convictions. In his career as Governor of the State of New York and as President of the United States he demonstrated in the most impressive manner that he is second to no historical character of this country.

As bearer of the executive power he invariably subordinated party interest to the common welfare.

He never hesitated to solve the most important questions according to his own unbiased convictions, resisting all pressure from members of his own party. On several occasions, seeing his party in danger of being misled, he successfully and unfalteringly withheld their pressure without considering the opposition of party leaders. We need only refer to the firmness with which, notwithstanding the strong tendency of his party in the South and far West to bring about an unlimited coinage of silver, he unhesitatingly warned them of the dangers liable to arise from such a policy. His innate sense of duty can not better be proven than by the fact that during his Presidential administration, as well as during his second candidacy, he never was a favorite with machine politicians, whose aim is their own welfare.

Grover Cleveland also distinguished himself by a more than ordinary measure of political sagacity and statesmanlike foresight. It is not only by his determined stand on the silver question that he has shown himself to be an admirable exponent of these qualities, but by his highly creditable treatment of the tariff question he forever secured for himself one of the most conspicuous places in the history of our Republic. He keenly recognized in the protective system, fostered by the Republicans for many years with the tendency of levying still more oppressive duties, a steadily growing evil that required immediate and strong remedies, and he fearlessly expressed his views in his celebrated message to Congress. It was owing to his intelligence and courage that tariff reform was inscribed on the banner under which his whole party was united and led to glorious victory. There is no doubt that by following the same banner it will win another victory at the end of the present campaign.

Therefore, we earnestly beseech our fellow-citizens to aid us in securing the election of Grover Cleveland, the independent, far-sighted statesman, the true patriot, the honest and courageous man. We expect a hearty co-operation on the part of the German-Americans, the more so, as we are convinced they particularly should favor his candidacy as a true and immediate expression of the will of the people, which, at Chicago, triumphantly prevailed over all party usage, notwithstanding the opposition from delegates from his own State, as well as the politicians in general. We do not hesitate to make this appeal to our countrymen, because the platform of the Democratic party is entirely satisfactory in regard to the main questions. It calls for civil service reform; it advocates that gold, silver and paper money be placed on an absolutely equal basis, and that the obnoxious so-called Sherman law be repealed. It aims at the reformation of the existing protective system that tends only to enrich the owners of industrial establishments and to impoverish the masses of the people, and strives to re-establish the good old principle of limiting the amount of duties levied to the actual requirements of the Government.

PREVENTION VS. CURE.

No One Who Obeys These Instructions Need Have Any Fear of Cholera.

OFFICE CITY PHYSICIAN,
MAYSVILLE, September 17, 1892.

HOW CAUGHT.

Healthy persons "catch" cholera by taking into their systems through the mouth, as in their food or drink, or from their hands, knives, forks, plates tumblers, clothing, &c., the germs of the disease, which are always present in the discharges from the stomach and bowels of those sick with cholera.

Thorough cooking destroys the cholera germs; therefore don't eat raw, uncooked articles of any kind, not even milk.

Don't eat or drink to excess. Use plain, wholesome, digestible food, as indigestion and diarrhoea favor an attack of cholera.

Don't drink unboiled water.

Don't eat or drink articles unless they have been thoroughly and recently cooked or boiled, and the more recent and hotter they are the safer.

Don't employ utensils in eating or drinking unless they have been recently put in boiling water; the more recent the safer.

Don't eat or handle food or drink with unwashed hands, or receive it from the unwashed hands of others.

Don't use the hands for any purpose when soiled with cholera discharges; thoroughly cleanse them at once.

Personal cleanliness, and cleanliness of the living and sleeping rooms and their contents, and thorough ventilation should be rigidly enforced. Foul water-closets, sinks, faucets, cellars &c., should be avoided, and when present should be referred to the Health Board at once and remedied.

PRECAUTIONARY MEASURES OF TREATMENT.

The successful treatment and the prevention of the spread of this disease demand that its earliest manifestations be promptly recognized and treated; therefore:

Don't doctor yourself for bowel complaint, but go to bed and send for the nearest physician at once. Send for your family physician.

Don't wait, but send at once.

If taken ill in the street, seek the nearest drugstore, and demand prompt medical attention.

Don't permit vomit or diarrhoeal discharges to come in contact with food, drink or clothing. These discharges should be received in proper vessels and kept covered until removed under competent directions. Pour boiling water on them, put a strong solution of carbolic acid in them (not less than one part of acid to twenty of hot soap suds or water.)

Don't wear, handle or use any articles of clothing or furniture that are soiled with cholera discharges. Pour boiling water on them or put them into it, and scrub them with the carbolic acid solution mentioned above, and promptly request the Health Board to remove them.

Don't be frightened, but do be cautious and avoid excesses and unnecessary exposures of every kind.—World.

He founded the Ottumwa Courier over forty years ago."

Legislative Notes.

The House was the only branch in session yesterday. A joint resolution was adopted by a vote of 48 to 2 to instruct the Governor to petition the President to allow no immigrants from cholera infected districts to be brought in this country in the next sixty days.

The vetoed bill on classification of cities and towns, which had been introduced as a new bill, was again passed by a unanimous vote, and then the revenue bill was taken up. A motion to consider it section by section was adopted, and the debate then began on the amendments proposed. The first question upon which a controversy arose was on an amendment to provide that the traveling expenses of the county students of the A. and M. College be paid out of the tax collected for the benefit of the college. The amendment was adopted by a vote of 50 to 20.

The House disposed of a large number of the amendments after this without debate, which was very encouraging, considering that the first proposition taken up had consumed an hour or more. If the good record is kept up the House will dispose of the bill in short order.

The funeral will take place to-morrow from his late residence. Burial at Washington.

"THERE is some comfort," says the Commercial Gazette, "in the assurance of Professor Virchow, who has studied the cholera epidemic in Russia, that it is less dangerous than diphtheria. Diphtheria certainly is bad enough, but can be, to a great extent, managed by intelligent care. The fact of its being so common in the United States robs it of the terrors of cholera, which comes but once in a while as a foreign-bred visitor."

WEEKLY REVIEW OF TRADE.

The Heaviest Trade Ever Known at This Season of the Year is Now in Progress.

The Outlook for the Future is Exceedingly Good—Failures for the Week.

NEW YORK, Sept. 17.—R. G. Dun & Company's weekly review of trade says: Cholera has landed, and the business of New York goes on exactly as if it had not. Cars are as crowded with passengers, and streets as badly blocked with cartloads of merchandise as they were one week or one year ago, which means that the heaviest trade ever known at this season is now in progress. The same is true of other cities almost without exception, and the outlook for fall trade is at all points regarded as exceedingly good.

But many people are afraid that all other people will be afraid, and consequently speculative markets decline. The selling of stocks has been quite heavy, and the decline in prices has averaged about \$2 per share for all the active list. Money is in ample supply, and the demand from the interior is less than usual at this season, but large amounts are held out of the loan market by people who are looking for exceptional opportunities to buy cheaply.

There has been much talk about pestilence as an excuse for low prices of breadstuffs and cotton. But the fact is that the enormous stocks brought over from last year offered a sufficient reason for exceedingly low prices.

Receipts of wheat at the principal western ports in four days of this week have been 5,816,833 bushels, while the Atlantic exports have been only 1,065,435 bushels, and it is not strange that the price has declined three-quarters of a cent. At seventy-seven and five-eighths cents, wheat is lower than it ever has been in New York, except in two days in 1884.

Corn has declined one-half cent in sympathy, but it is also the fact that western advices regarding the growing crop are more favorable.

Oats have fallen half a cent, and lard is a shade weaker. In cotton there has been heavy selling, and September options are below seven cents, though the price for spot cotton is unchanged. Oil has declined half a cent, but coffee is three-eighths stronger.

At Boston trade in dry goods is unusually large for September, and the market for print cloths is almost bare, while cotton goods are sold far ahead of production, and in bleached goods some advance appears. Woolen mills are well supplied with orders and the distribution is remarkably full. Boot and shoe shops are crowded with orders and leather is active, with some kinds of finished uppers high in prices.

At Philadelphia trade in dry goods is the most satisfactory for many years, and the carpet manufacturers are busy. Western and southern buyers are liberal in their purchases and in dress goods, especially, an increased trade is expected; wool is in fair demand, tobacco improves, and trade in chemicals is active, and, especially, in disinfectants.

At Pittsburgh the iron trade improves with increased demand, though Bessemer pig is weaker. Window glass works are resuming, but the Monongahela coal miners are idle because of a difference about wages. Trade at Cleveland is good in most lines and fair in dry goods, crockery and drugs, with iron in better demand and money active. Retail trade at Cincinnati is quiet, but the western lumber trade shows an increase of 20 per cent. over last year. At Detroit orders for freight cars exceed capacity of works for months to come, more grain and ore are moved than in previous years and trade prospects are favorable.

At Chicago business increases and nothing adverse appears, though some decrease is seen in receipts of wheat, rye, barley, cheese, dressed beef and 50 per cent. in lard and wool compared with last year, while in flour, corn, oats, cured meats, butter, cattle and hogs considerable increase appears. Trade at Milwaukee is brisk and at Omaha excellent. A generous fall trade is expected at St. Louis if pestilence does not interfere, and at Kansas City business is satisfactory and receipts of grain and cattle large.

At all western points collections are reported very good. Trade at Louisville is improving; at Nashville fair, and at Little Rock satisfactory, while at Montgomery caution prevails, and at Galveston the late cotton crop causes slow collections, though trade otherwise improves. At New Orleans business is only fair and money is in strong demand, but cotton is lower, while sugar and rice are active and strong.

Iron is more steady, the output for Sept. 1 being only 151,648 tons against 155,136 Aug. 1, and unsold stocks have been reduced about 63,000 tons. The demand for structural iron is very encouraging and plate mills are well supplied, but quotations are variable and bar iron is unsettled. Copper is lower at 11-14 cents, and tin at 20.3, in spite of large distribution, but lead is more steady at 4.15 cents.

In dry goods there has been a notable increase in number of buyers, and the market is more nearly bare of woolen goods than it has been for years, the medium worsted and the serge trades having the preference. There is a heavy demand for cottons, and medium bleached goods are higher with brown firm. Carpets are stronger, and many mills demand an advance of two and one-half cents.

Money has been steady at 4 per cent. while foreign exchange has fallen so far that exports of gold are unprofitable. Merchandise exports fall below last year, as is natural, because shipments then were abnormal, the decrease in two weeks at New York being about 20 per cent. The treasury has added \$1,000,000 gold and \$600,000 silver to its stock, while putting out \$400,000 additional paper.

Here, as in all parts of the country, the supply of money is ample for legitimate means, and the shrinkage of speculation is helpful as regards the possibil-

ity of monetary pressure later. Respecting the cholera, it is well to remember that sanitary precautions are more thorough than ever before, and at most foreign cities have sufficed to prevent the spread of the disease.

The business failures during the last seven days number, for the United States, 154; Canada, 28; total, 182, as compared with 179 last week, 176 the week previous to the last and 239 for the corresponding week of last year.

Covered by Insurance.

VALPARAISO, Ind., Sept. 17.—Fire yesterday damaged Don Salyer's building, next to the Valparaiso postoffice. Salyer estimates the loss at \$1,000. Messrs. Case & Weir, attorneys, had their library damaged several hundred dollars. Summers' fruit store suffered from water. All the losses are covered by insurance.

Trade in Canada.

NEW YORK, Sept. 18.—Advices to Bradstreet's concerning the state of trade in Canada says: The receipt in Montreal of news that cholera had appeared in New York seems to have had more unfavorable effect on trade than elsewhere, so far as learned. Wholesale trade in leading lines continues fairly active.

Murdered by a Maniac.

WAVERLY, O., Sept. 17.—John J. Van Meter, aged thirty-five, lives near Idaho, Pike county, with his wife and two children. Van Meter is a maniac, and yesterday killed his wife and little girl. The oldest child found their bodies horribly mutilated, but the man had disappeared.
